

# Fighting healthcare inequality, at home and abroad

**Doctors of the World UK fights to reduce global health inequalities by improving access to healthcare.**

We believe access to healthcare is a human right, however all too often it is denied to the most vulnerable people in society, both here in the UK and across the world. Our programmes focus on long-term changes, rather than quick fixes, and at the heart of the organisation is a pioneering spirit. To find out how you can make a difference contact [info@doctorsoftheworld.org.uk](mailto:info@doctorsoftheworld.org.uk).
